Evolution Payroll - Getting Started

Evolution Payroll is a dynamic Payroll, HR, and Tax Management system developed by payroll and HR service bureau veterans for the Human Capital Management (HCM) industry.

It is a Web-based application that facilitates remote client tasks such as adding new employees, existing employee maintenance, managing and processing payrolls, running reports and more, via the Internet using a Web browser.

System Requirements

You must be using Evolution Classic version 16.47 or higher to use the Ad Hoc Reporting features. If you are a SaaS customer, these upgrades will be done for you.

Screen Resolution

The Optimum Resolution for Evolution Payroll use is 1920 x 1080. Evolution Payroll is designed to fit most screens and screen resolutions by using a Responsive Web Design (RWD), which allows the components within the application to be moved and resized based on screen size and resolution. The minimum supported resolution is 1360 x 768.

Internet Browser

Evolution Payroll is designed to leverage the features of the most current browser versions. For the best possible experience, we recommend using one of the browsers listed below.

Browser	Supported Version
Internet Explorer	10.0+
Firefox	28.0+
Chrome	33.0+
Safari	7.0+

Third Party Browser Extensions

Important: The use of third party browser extensions is prohibited when using Evolution Payroll. See the table below to learn how to disable extensions for your browser.

Security Settings

Access to Evolution Payroll is granted in Evolution Classic. Users may be granted access to as many or as few menus and functions in Evolution Classic Payroll as the service bureau determines appropriate.

User or Group Security Rights

Additional settings specify whether individual users have full access, read-only access, or no access.

- a. Go to the Admin - Security – Users (or Groups) screen, and select the user.
- b. Click the **Details** tab - **User Rights** button.
- Modify settings by right-clicking the green plus sign / red minus sign, and selecting Enabled or Disabled.
- Click the small **plus signs** (far left) to open a menu "tree". Everything can be selected individually to give or remove permissions to users.
- c. Click the black **plus sign** next to Employee to open related topics
- d. Right-click the item to be changed from standard group rights

Note: each item must be selected individually.

Enabled - the selected item is visible in the Edit Employee section of the Employees screens in Evolution Payroll. The user can Add/Edit and Delete Information.

Read-Only - the selected item is visible in Employees screens in Evolution Payroll. The Add button is disabled, and Edit and Delete are not functional for that item.

Disabled - the selected item is not visible in the Employees screens in Evolution Payroll.

D/B/D/T Level Security Restrictions

The Organization (D/B/D/T) Level Security in Evolution Payroll is controlled by the D/B/D/T level restrictions set in Evolution Classic, on the **Admin – Security – Users – DBDT tab** for the user's profile. Those settings affect three areas in Evolution Payroll:

- a. Employees will not be visible to a user if s/he is part of a D/B/D/T level to which the user does not have permission to view.
- b. The D/B/D/T level will not be available for selection throughout the application if the user does not have permission to view it.
- c. Checks will not be visible to a user if they belong to an employee who belongs to a D/B/D/T level that is blocked from the user.

Note: Pay Rates will also be hidden as part of the employee belonging to a D/B/D/T level that is blocked.

Logging into Evolution Payroll

Evolution Payroll uses the Enhanced Security Level setting from the **SB Admin – Service Bureau - Flags & Settings** tab in Evolution Classic. Currently there are three levels of enhanced security to choose from. The table below highlights the levels and their requirements.

Low

- Requires only a password to login
- Users must set up three questions / answers
- Forgot password functionality is available
- 3 unsuccessful login attempts will lock the account (forcing the user to answer the security questions)
- 3 unsuccessful answers to the general security questions will block the account

Medium

- Requires a password to login
- Users must set up three questions / answers
- The user is asked to define two Extra Security Questions / Answers in extended login
- Forgot password functionality is available
- 3 unsuccessful login attempts will lock the account (forcing the user to answer security questions)
- 3 incorrect answers to security questions will block the account

High

- Requires a password to login
- Users must set up three questions / answers
- The user is asked to define two Extra Security Questions / Answers in extended login
- Forgot password functionality is not available
- 3 unsuccessful login attempts will block the account

In addition to establishing the level of enhanced security, other security considerations must be set on this screen.

Terms of Use

Service bureaus can define the Terms of Use for their internal and external users. These Terms of Use are presented when users first log in, after the Terms of User are entered (or changed) on the [SB Admin - Service Bureau - Terms of Use tab](#).

When users log in and see the Terms of Use, they must accept the terms to use Evolution Payroll. Once accepted, the Terms of Use are not presented again unless a change is made by the service bureau to the terms. To accept the Terms of Use, click the **Accept** button.

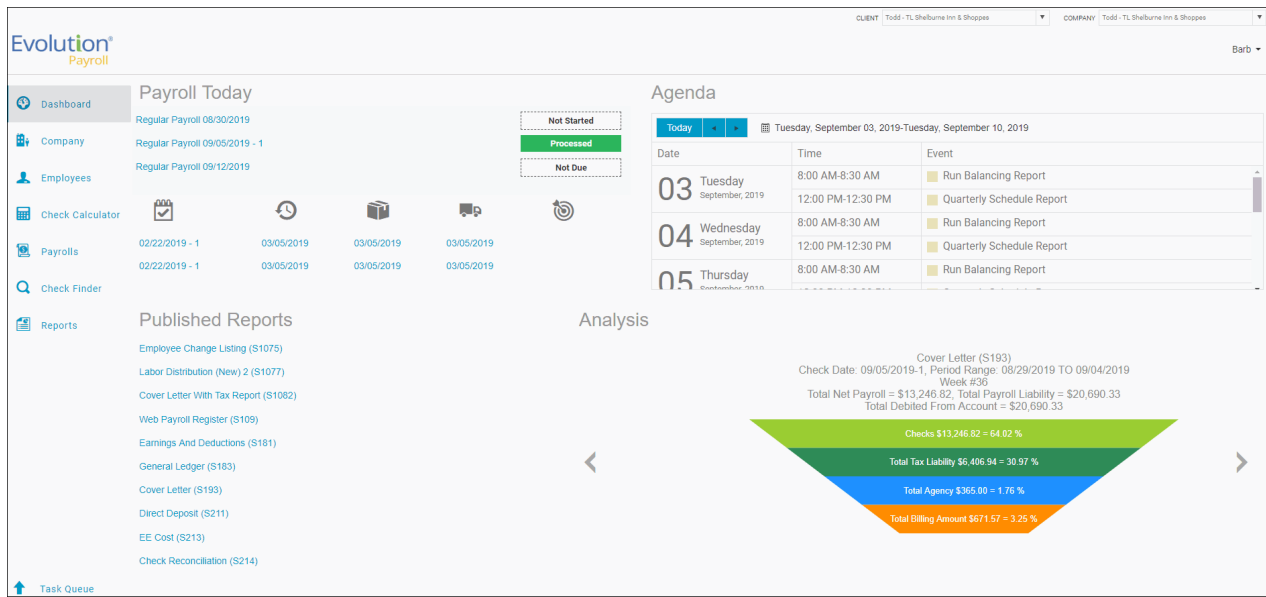

- New users are presented with the Terms of Use after the user has selected three security questions and answers.
- Existing users will see the Terms of Use upon initial login or if the Terms of Use have changed.

Note: If the service bureau has not entered anything in the Terms of Use tab, nothing needs to be accepted by the users.

When the user accepts, the Dashboard screen opens.

The Dashboard

Information on the Evolution Payroll Dashboard is laid out in sections, or tiles, from which users can navigate to the information selected. Dashboard functionality is covered in more detail later in this guide.

Header

In the Header at the top of the screen, far left, is the company's logo.

The clients and companies are selected from the dropdown lists in the upper right corner of the screen. When the Dashboard first opens, the default client shown is the one with the lowest Internal Client Number. The client and company fields are accessible in every screen within Evolution Payroll.

Note: When a different Client/Company is selected, regardless of the menu in which the user is working, the user is automatically returned to the Dashboard screen.

Menu Bar

Use the Menu Bar on the left-hand side of the screen to navigate within Evolution Payroll, similarly to the Menu Bar in Evolution. Menu Items are selected from the main screens of each menu. Each menu is covered in more detail later in this Guide.

Payroll Today

The Payroll Today tile offers a snapshot of payrolls scheduled around the time of the viewing. The payrolls listed are links that, when clicked, take you to the Batch Settings screen for the payroll selected. Normally the first payroll is the most recently run prior to current day. The next are payrolls scheduled to go out on the current day or in the very near future.

There are tabs you will see in the application that open from the sides, called Fly-out tabs. These will be discussed in detail within the Evolution Payroll modules.

The Menu Bar

The Menu Bar contains many of the same menus as are in Evolution, based on security rights the user has been given. Note that the list of Menu Items within each menu are color-coded to match the menu selected, indicating in which menu the user is currently working.

The Evolution Payroll Dashboard Information is laid out in sections, or tiles, from which users can navigate to the information selected.

Company information, including settings and rules established by the company can be viewed in the Company menu. The fields' values are taken from corresponding fields in Evolution Classic. The data in the Company menu is currently read-only however it can be edited in Evolution Classic.

Employee information can be added, viewed, and edited in the Employees menu.

Opens the Check Calculator screen on which non-payroll employee checks can be calculated from Gross-to-Net or Net-to-Gross.

Payrolls are processed quickly and easily through Evolution Payroll. The first screen in the Payrolls Menu is the Payroll Timeline, displaying coupon or card-like views of scheduled payrolls.

The Check Finder menu link opens a Check Finder screen on which parameters are entered to search for a specific check by check number or employee code / name within a particular date range, and status.

The Reports menu lets the user see reports that have been published to Evolution Payroll from VMR, as well as process additional reports as needed.

The Company Menu

Company information, including settings and rules established by the company can be viewed in the Company menu. The fields' values are taken from corresponding fields in Evolution. The data in the Company menu is currently read-only however it can be edited in Evolution.

Once a user clicks the **Refresh Scheduled E/Ds** button, the payroll is locked from any adjustments while the refresh process is executing; it displays a “Refreshing E/Ds – Please wait” message. The Payroll Hot Keys also do not work while the system is locked for the refreshing task.

- Manually-added check lines are not impacted by the Refresh Scheduled E/Ds process. If a user deletes a manually added check line – refreshing will not revert it back to the original value.
- If a user deletes a locked check line (E05 for example) and then adds a new check line of E05, when they click the **Refresh Scheduled E/Ds** button, the system will return the original E05 and leave the new one, so that there are now two check lines
- The **Refresh Scheduled E/Ds** button is not enabled for Third Party or Void checks.
- If a check has no check lines – the button remains enabled.
- The **Copy Payroll** button can be used if the user wants to use the default Scheduled E/D setup and the payroll being copied had changes to some of the Scheduled E/Ds.

The Reports Menu

The Reports menu lets the user see reports that have been published to Evolution Payroll from VMR, as well as process additional reports as needed.

There are two report types identified that we refer to

- Defined Reports , and
- Published Reports.

Defined Reports are reports that can be generated from Evolution Payroll on demand.

Published reports are reports that are generated in Evolution Classic and sent to Evolution Payroll using VMR.

Defined Reports

Defined reports are company level reports that can be generated by the user on demand in Evolution Payroll. These reports must be set up for the company in Evolution Classic on the [Reports – Setup Reports screen](#). Refer to the Appendix at the end of this chapter for a list of available reports that can be generated in Evolution Payroll.

Ad Hoc Reports

Evolution Payroll contains an Ad Hoc Reporting feature, similar to Evolution Classic. Users can add a new Ad Hoc report, edit an existing Ad Hoc report, and run an Ad Hoc report.

Ad Hoc reports are executed at the users' discretion and can be customized. Capabilities include:

- Adding / removing columns
- Defining column headers and captions
- Filtering on any field (not just those in the visible columns)
- Grouping by fields
- Completing selected summary tasks in grouping such as Count, Sum of Integer Values
- Creating calculations based on columns in the reports
- Exporting the report results to Microsoft Excel

Similar to Evolution Classic there are three general categories of Ad Hoc Reports:

- Ad Hoc - Payroll (S1132)
- Ad Hoc - Employee (S1134)
- Ad Hoc - Company (S1153)

These reports serve as templates, and can be selected and used as a base Ad Hoc report to which modifications can be made and saved with a new report name.

Security Settings

Users must be granted security rights access to Ad Hoc reports in Evolution Classic to use Ad Hoc reports in Evolution Payroll.

1. Go to **SB Admin - Security - SB Templates**.
2. Select the template used.
3. Scroll down to Reports, and click the small **plus sign** to the left.

Verify there is a green plus sign to the left of Ad Hoc Reports. If there is a red minus sign, right-click the **Minus-sign** and select Enabled.

Setting up the Report

The report must be added at the service bureau level, so it is available at the report level in Evolution Classic.

1. Go to the **Bureau - Company Default Reports - Details tab**.
2. Click the **plus sign** in the toolbar to create a new record.
3. Select System in the **Level** field dropdown list.
4. Select the report to be added in the **Report** field dropdown list.
5. Click the **check mark** and the **commit** button in the toolbar to post and commit changes

Adding a New Ad Hoc Report

1. Click the **Reports** menu to open.
Result: The Published Reports screen opens.

- Reports may contain as many columns as can fit into a horizontal row of 133 characters.

Note: If a field is added that extends the row length beyond 133 characters, the report may or may not execute. If it executes, truncation of all data beyond the 133rd character will take place.
